

HANDS-ON WORKSHOP · TWO SESSIONS

OAuth 2.0, JWT/JOSE & FAPI 2.0

Build it, break it, and learn to teach it — not just recognise the diagrams.

Flows

Tokens

JWT / JOSE

Security

FAPI 2.0

WHAT YOU'LL WALK AWAY ABLE TO DO

- ✓ Choose the right OAuth flow and draw Authorization Code + PKCE from memory
- ✓ Validate JWTs properly — and explain why decoding is not validation
- ✓ Map real-world attacks to the controls that stop them
- ✓ Explain FAPI 2.0 as strict OAuth for high-value APIs

WHAT WE COVER — ACROSS TWO SESSIONS

SESSION 1 · AVAILABLE NOW

- 1 OAuth problem, actors & endpoints
- 2 Authorization Code + PKCE
- 3 Client Credentials, Refresh & Device
- 4 Token validation & JWT basics

SESSION 2 · DATE TBA

- 5 JWS, JWE, JWK / JWKS
- 6 OAuth security controls
- 7 Advanced: PAR, JAR, JARM, DPoP, mTLS
- 8 FAPI 2.0

HOW IT WORKS

Two sessions, hands-on

Each topic: concept → diagram → run a real Go demo → explain it back.

WHO IT'S FOR

Backend, API & security engineers

Anyone building APIs, adding “Login with...”, or heading toward open banking / FAPI.

Session 1: _____ Session 2: to be announced Register: _____
